

Synopsis of Church Council Meeting

May 17, 2011

- ◆ We have a positive net income of \$9,845 through March 2011.
- ◆ Ash Tree Problem - Council voted to remove the one ash tree which is presently infected with the ash tree borer. It is located on the west side (Ackerman) of the church. In addition, we will treat the remaining ash trees located on both the south side (Stroop Road) and west side (Ackerman) of the church as these trees provide shade for the building. This treatment should prevent the trees from being affected by the ash tree disease. At this time we will not treat the ash trees on the north side (Kenosha) of the church but will continue to observe them. Council is considering removal of the small ash trees leading up to the connector entrance of the church. No decision has yet been made concerning these trees.
